Github:

https://github.com/834840102/dynamic-finalproject-group5/tree/main/group5_app/comps

For Nutritional Spaces app, we have 5 main pages and 27 suggestion pages. We split the task among all members, we will finish our own tasks and then push to Github and merge into the main branch.

- 5 Main pages included:

- First page when the user opens the app will show the logo.
- Homepage
- Age range page
- BMI page (picking your result of weight to healthy path)
- Goal page (included lose weight, maintain weight, gain weight).
- 27 suggestion pages

For the suggestion pages, users will choose their BMI, age range, then select their goal if they want to lose weight, gain weight, or maintain weight. After that, we will give them advice, warning, or suggest based on their data.

Tasks:

- **Charlene:**

- **Components:** Page layout, image component, logo component.
- **Pages:** First main page, first 7 suggestion pages (3 underweight pages, 3 normal weight pages, 1 overweight pages for the first age range (15-21)).

- **John:**

- **Components:** Goal button, suggestion box.
- **Pages:** Goal page, the next 7 suggestion pages (2 overweight pages for the first age range (15-21); 3 pages about advice for maintaining weight, 2 pages for normal weight suggestion for the second age range (22-35)).

- Yuma:

- **Components:** Small logo component, page layout.
- **Pages:** Homepage, the next 7 suggestion pages (1 page for normal weight suggestion for the first age range (15-21), 3 overweight warning pages for the second age range (22-35), and 3 pages for underweight pages for the last age range (above 35)).

- Sandy:

- **Components:** Button, text components.SmallLogoComponent.stories.js
- **Pages:** Age range, BMI page, the left 6 suggestion pages (3 underweight pages, 3 normal weight pages, 3 overweight pages for the last age range (above 35)).
